

# Ford Raptor 2009 to 2011

## Ford Extended Cab 2006-2008

### Install

1. Remove outside rear seat rail bolt on passenger front seat. Remove plastic at roof where rear door latches. Remove passenger side clothes hook. Remove headrest.
2. Install the upper/rear side screen bracket, facing towards the clothes hook area. Install the lower rear side screen bracket facing the headrest area. **SEE PHOTO for which side UP** Place the side screen in the vehicle and reinstall the headrest through the long bracket. **Holes front.**
3. Install the screened floor bracket to the lower side screen. Will help hold everything in place. Install the lower front screen bracket under the seat rail and loosely replace the nut/bolt.
4. Install the upper front screen bracket firmly to the front screen. Install foam tube around the upper front screen with zip ties.
5. Connect the front screen and side screens together along with the remaining bolt hole of the screened floor bracket. Attach the lower front screen bracket to the front screen.
6. Pull side screen back to the rear and attach the upper bracket directly next to the clothes hook hole and fasten with a tap screw.
7. Align the front screen for square with the side screen and attach to the doorpost closure point. Should be under the plastic molding area. Tap screw with two taps. You can now tap screw the screened floor bracket to the floor. Finish foam tube
